ABOUT ME

Hello, my name is Tomas, and if there's anything I hate more than self-praise, it's falling into clichéd or overused phrases. However, just because something is overused doesn't mean it's not true. Therefore, it's with some reluctance that if I had to choose one word to describe myself, it would be "passionate."

Passion and the desire to give my best cover all aspects of my life, from the simplest tasks, such as changing a light bulb or assembling a shelf, to more complex tasks such as those relate to technology. I am an agile and versatile coder whose passion is constantly fueled by the very nature of the discipline: there is always something new to learn, the challenges never stop, and the work itself constantly motivates me to want to

SKILLS

HTML, CSS, JavaScript, TypeScript, Java , Golang
